

# Soft Washing Machine

Washing the surface with a gentle mist of water almost creates a jewel out of an ordinary paving stone or a concrete slab.

With the KVM soft washing machine you can extend your range of products with pavers and slabs which have an unmistakable nature and so new markets open up, the washing depth is 2-3mm.

If larger stones have to be exposed, the KVM hard-wash is the solution with a washing depth of 4-8mm.

## Advantages

- New products
- Exposed aggregates

## Specifications

Water consumption 100L/hour  
Washing depth 2 - 3 mm  
Bidirectional washing
